

COAST Seat with wooden slats

5506

Designed by
Allan Hagerup

Coast seat with wooden slats is Vestre’s contribution to safeguarding and celebrating the world’s oceans. It is the first bench to be made from ownerless ocean plastic, i.e. plastic that has been discarded in the ocean and then drifted for a long time before washing up along the coastline. COAST is also our first product with ‘Materials as a Service’, which means that the bench can only be leased. Leasing means that recycling is no longer simply an option—it is an integral part of the model. This ensures that the plastic never ends up as waste again. COAST is a solid bench, built to endure outdoor use. It can also be supplied with wooden slats.

Anchoring/assembly

Free-standing/mounted to the ground

Primary material

Hot-dip galvanised steel

All steel components are hot-dip galvanised, which produces a matt grey surface after a while. We offer a lifetime anti-rust warranty.
