HABITATS Leaf

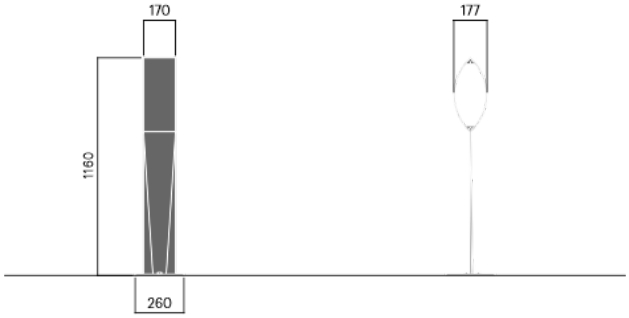

5903A

Designed by
Alexander Qual, Rethink

Habitats leaf is part of the Vestre Habitats series, where the products are designed to protect and increase biodiversity in cities. Leaf is an insect hotel that gives insects a home in urban neighbourhoods. The shape of the product is based on a stylised leaf. The design is minimalistic and also has a sculpture-like character which can easily be placed either alone or in groups. Leaf can be placed in planters, flower beds, on roof terraces or in parks—you can let your imagination run wild. The most important thing to remember is to ensure that the biological, species-typical parameters are considered and thus enrich the opportunities for insects to survive in urban environments.

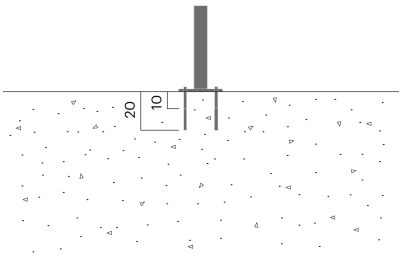

DANISH DESIGN AWARD
WINNER
2022

12 kg

Anchoring/assembly

Type A - Base plate

Primary material

Hot-dip galvanised steel

All steel components are hot-dip galvanised, which produces a matt grey surface after a while. We offer a lifetime anti-rust warranty.

Sustainability

Indicators	Global warming	Total energy used	Recycled materials
