

# YPSILON Seat

6206

Designed by  
Daniel Rybakken

Ypsilon seat is easily recognisable thanks to its angled, solid glulam beams which rest on laser-cut and arched sheets of galvanised steel. The angled wooden beams offer a number of functional benefits: they provide a comfortable seating surface, while their sloping surfaces mean that water will quickly drain off the bench. They also open up the possibility of very long straight and circular models. The YPSILON is available either with or without a backrest and armrests, with a tabletop and in 200 RAL colours for the steel.

## Anchoring/assembly

Free-standing/mounted to the ground

## Primary material

Hot-dip galvanised steel

All steel components are hot-dip galvanised, which produces a matt grey surface after a while. We offer a lifetime anti-rust warranty.

## Sustainability

Indicators	Global warming	Total energy used	Recycled materials
Unit	kg CO2	MJ	%
Cradle to Gate A1-A3	52	990	0

## Certifications
