

ACCEPTOR 160

2145

Designed by
Artur Wozniak

Acceptor 160 is an intuitive, modular waste-sorting system that can be extended to incorporate the required number of sorting options. It has a large capacity and can be supplied with openings on both sides. Differentiated openings in a choice of colours make sorting waste easy. The Acceptor 160 is easy to empty by opening the door and removing the bin bag, with no heavy lifting required.

Anchoring/assembly

Free-standing/mounted to the ground

Primary material

Hot-dip galvanised steel

All steel components are hot-dip galvanised, which produces a matt grey surface after a while. We offer a lifetime anti-rust warranty.

5 mm
