HABITATS Pile

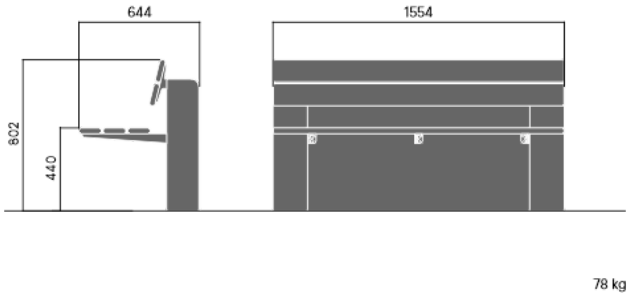

5813A

Designed by
René Hougaard, ARDE

Habitats pile is part of the Vestre Habitats series, where the products are designed to protect and increase biodiversity in cities. With the Pile bench, excess materials such as large stones and gravel can easily be arranged into small piles of stones. These piles create variations in light, temperature and humidity. They also store heat from the sun, which is handy for heat-loving insects and reptiles.

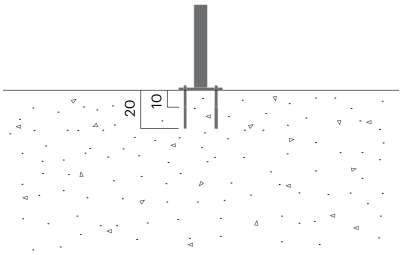

WINNER
2022

78 kg

Anchoring/assembly

Type A - Base plate

Primary material

Hot-dip galvanised steel

All steel components are hot-dip galvanised, which produces a matt grey surface after a while. We offer a lifetime anti-rust warranty.

Sustainability

Indicators	Global warming	Total energy used	Recycled materials
Unit	kg CO2	MJ	%
