Additional content provided

Step 1

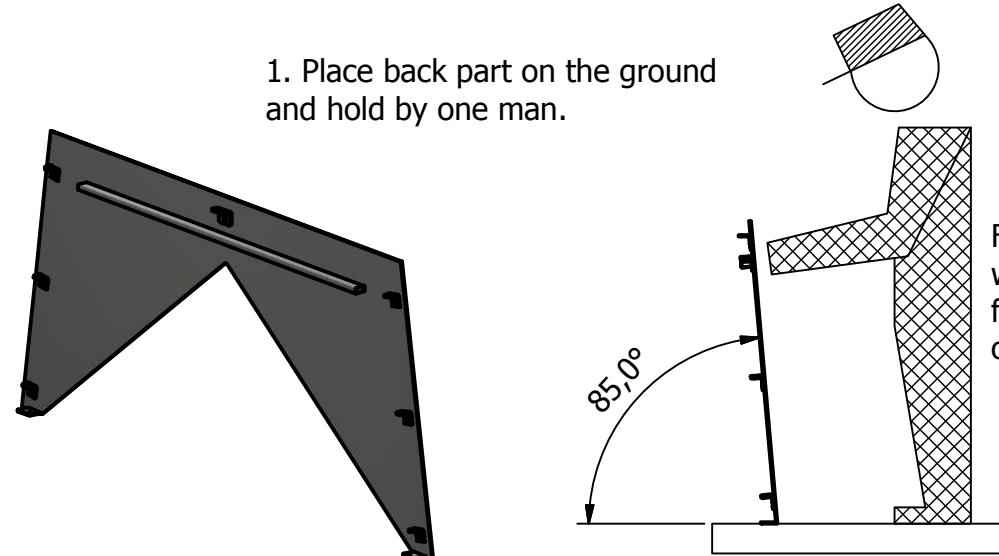

For safety reason you will need 3 people for the mounting operation process.

Approx time to mount 30min.

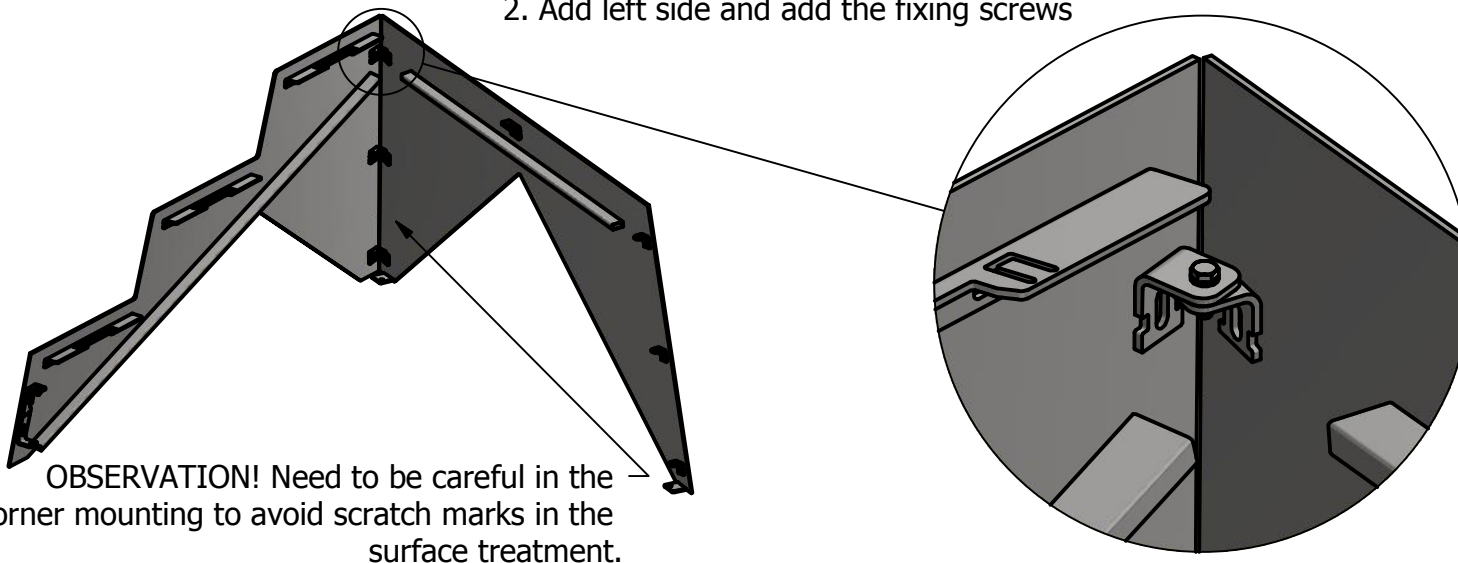

Step 2 : Mounting base with back and sides

1. Place back part on the ground and hold by one man.

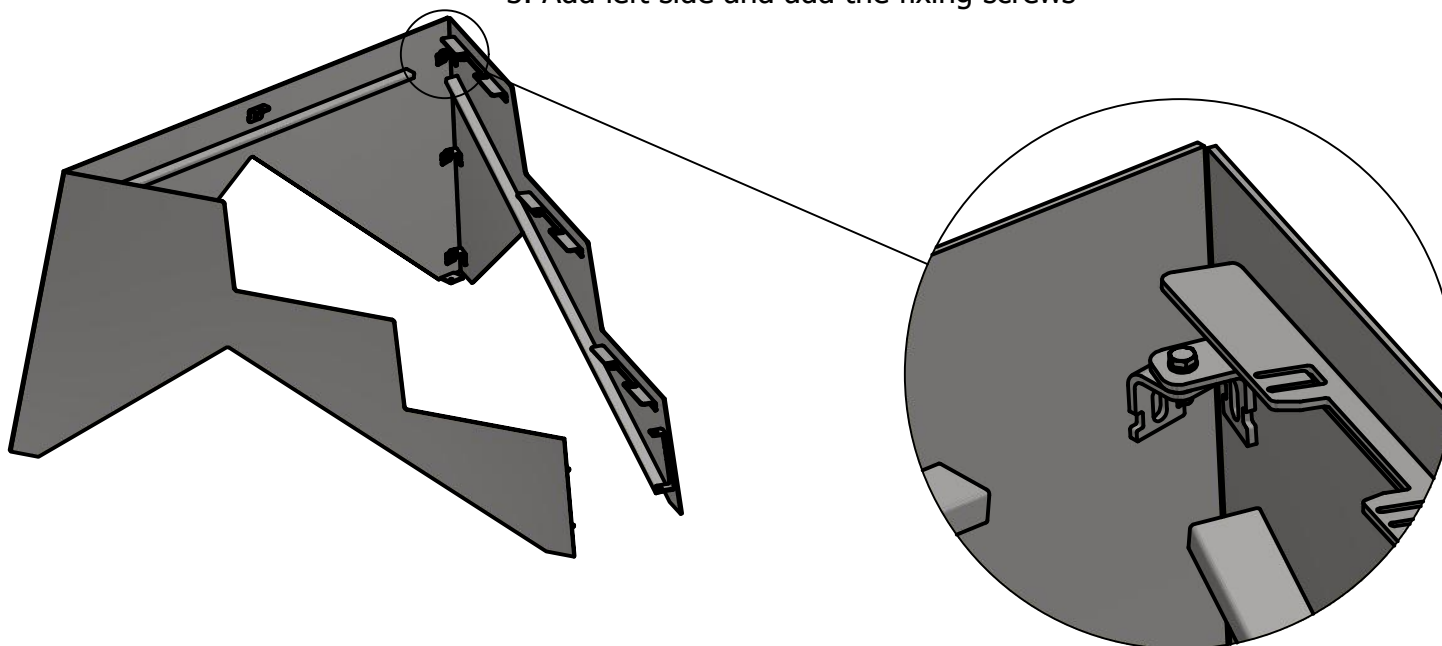

For safety reason you will need 3 people for the mounting operation process.

2. Add left side and add the fixing screws

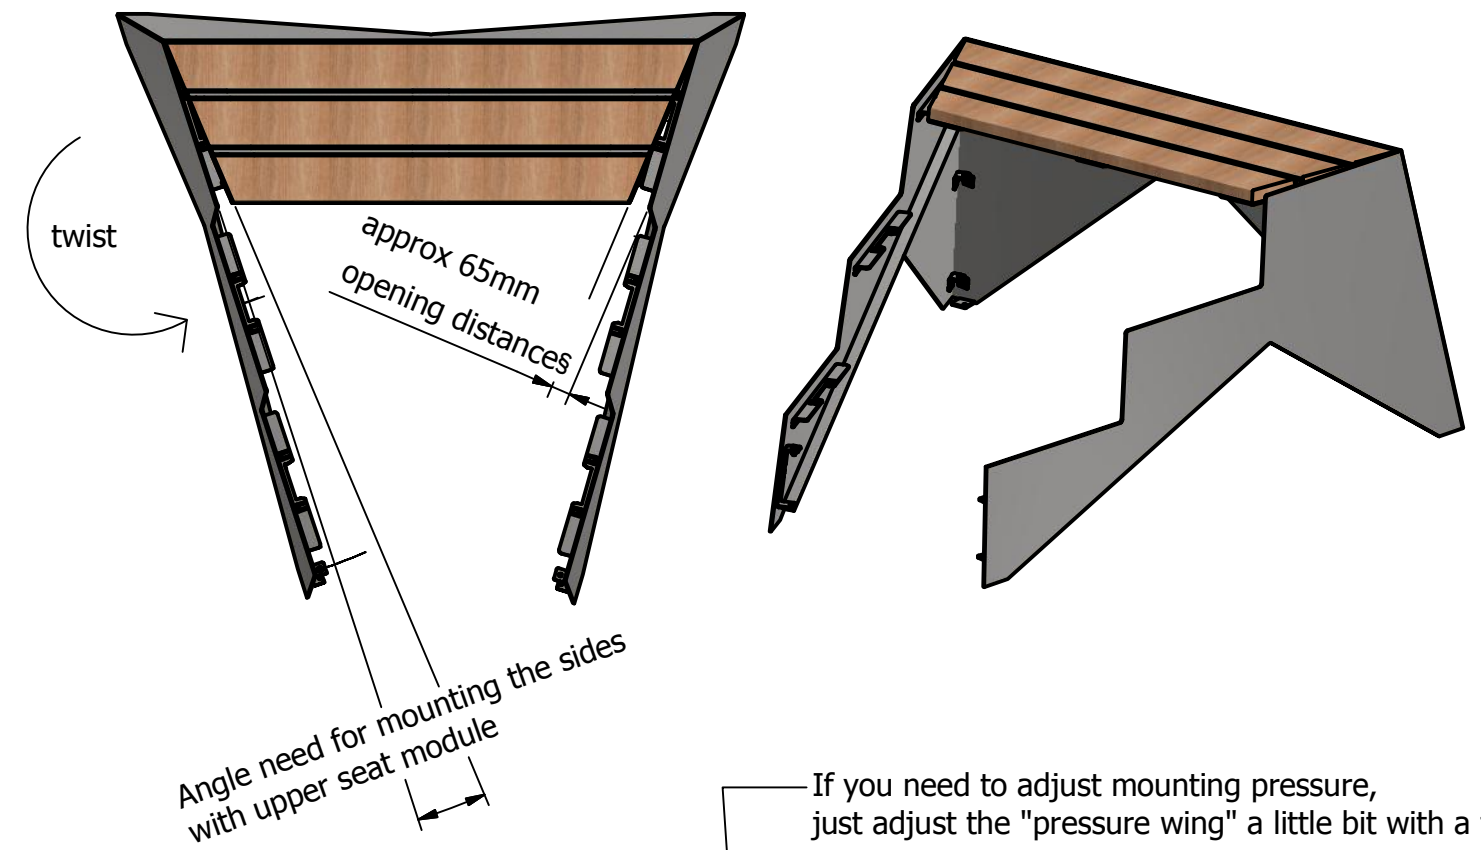

3. Add left side and add the fixing screws

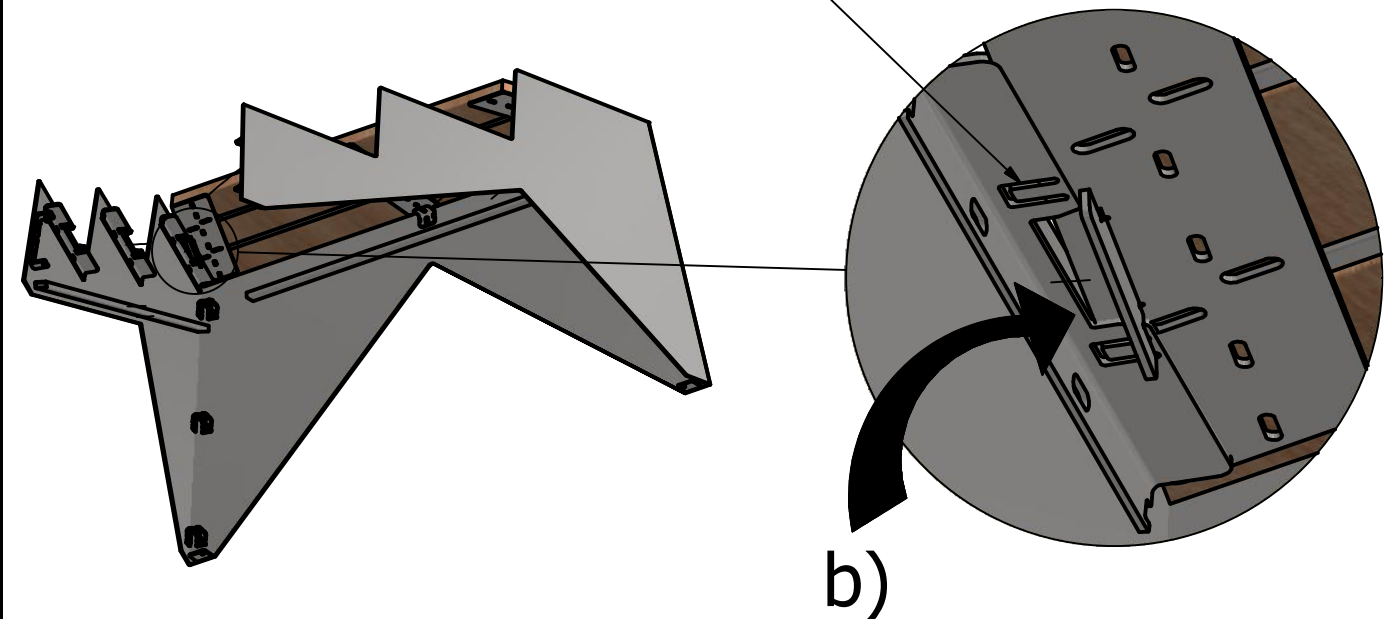

Step 3 : Mounting upper seat module

4. a) Open the side legs with small angle and add the upper seat module.

b) Twist the sides in and they will get fixed in the construction.

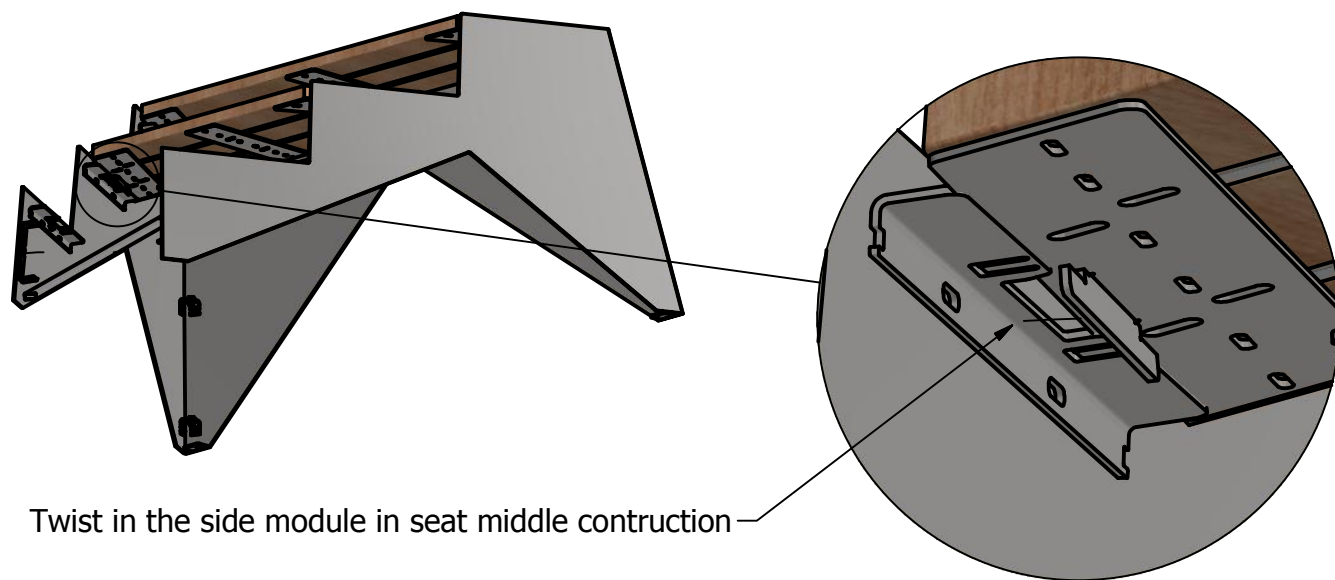

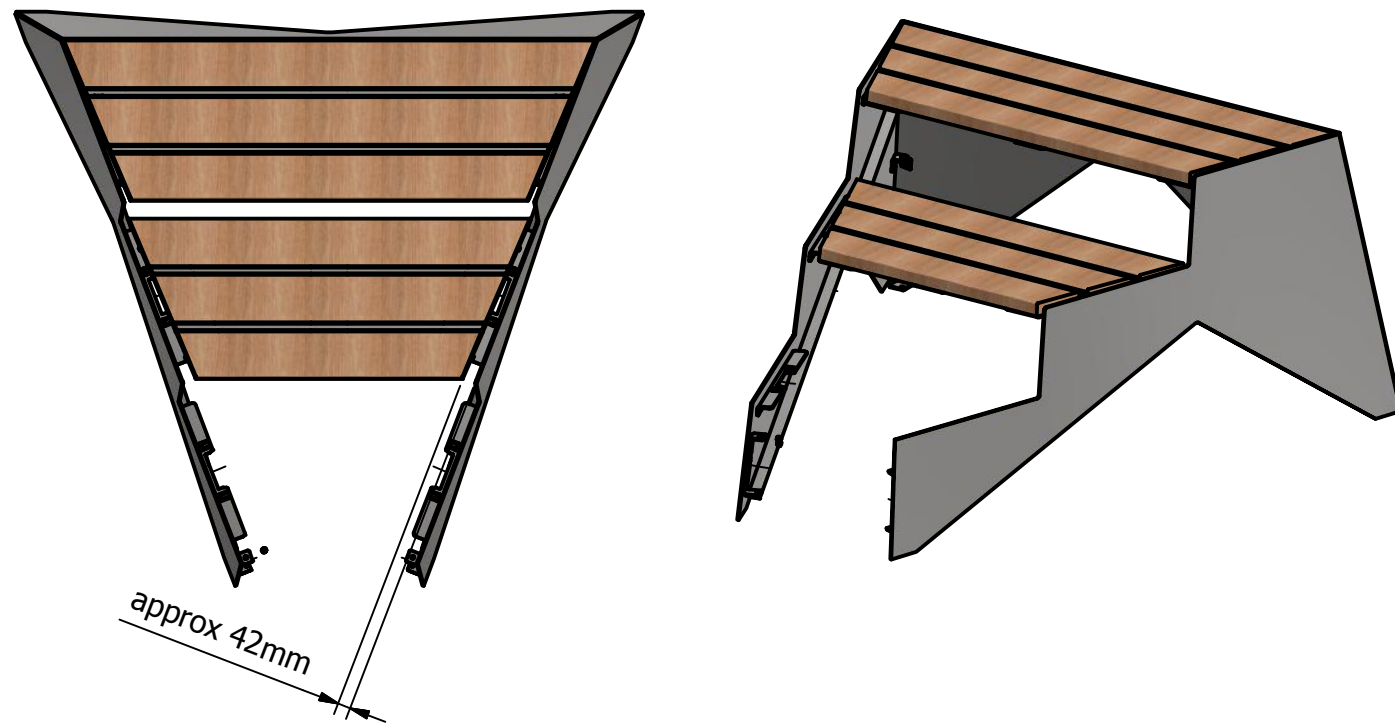

If you need to adjust mounting pressure, just adjust the "pressure wing" a little bit with a tool

STEP 4: Mounting middle seat module

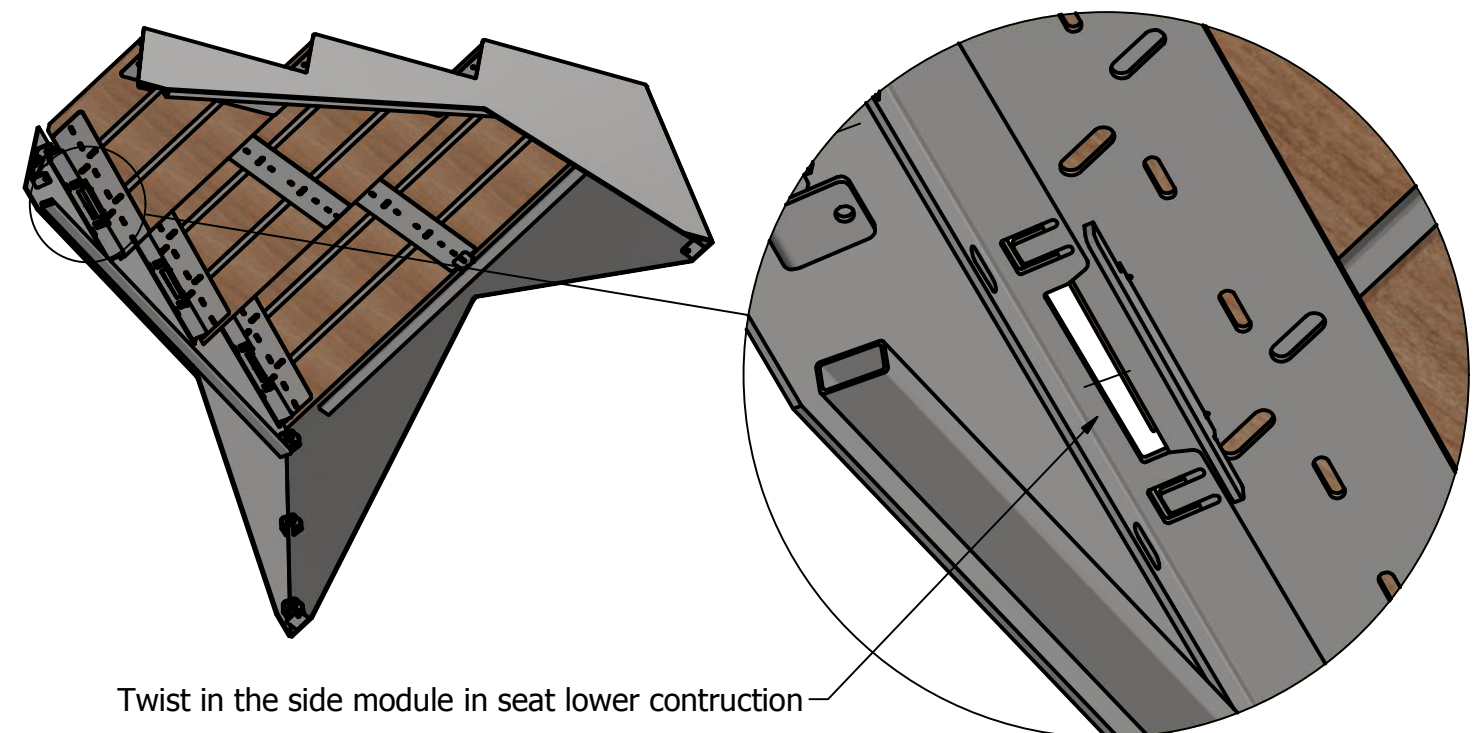

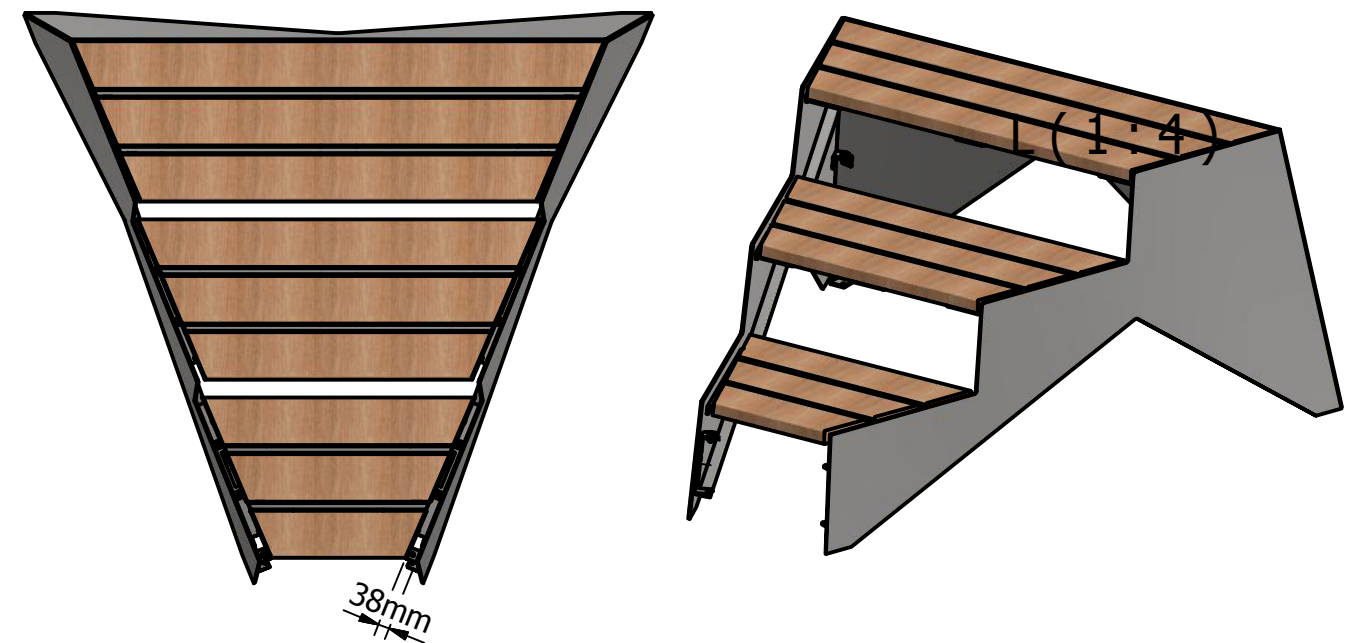

- a) Same procedure as mounting upper seat module.
- b) Open up angle little bit. Measure distance like in picture.
- c) Twist the sides in and they will get fixed in the construction.

Twist in the side module in seat middle construction

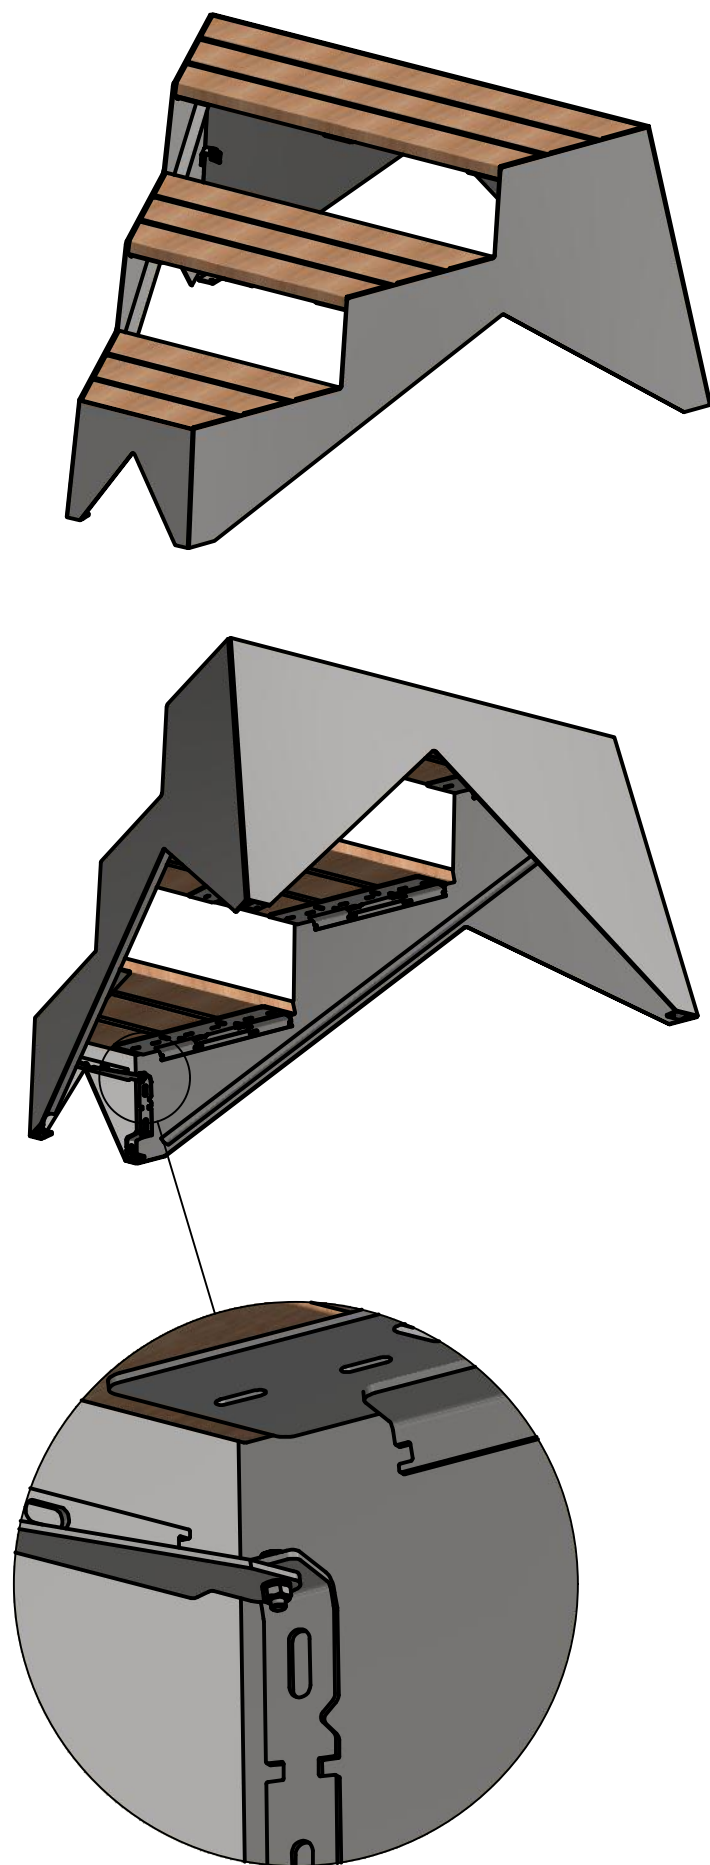

STEP 5: Mounting lower seat module

- a) Same procedure as mounting upper and middle seat module.
- b) Open up angle little bit. Measure distance like in picture.
- c) Twist the sides in and they will get fixed in the construction.

Twist in the side module in seat lower construction

STEP 6: Mounting end module

STEP 7: Mounting to the ground
