Approved by board of directors 30.03.2023. Last modified 16.03.2023.

At Vestre we promote decent working and environmental standards in our supply chains. We cooperate closely with our suppliers and business partners in pursuit of this aim. Accordingly, we have prepared this code of conduct to illustrate what we expect of our suppliers and business partners. The code of conduct covers human rights, workers' rights, the environment and corruption.

## **Introduction**

Vestre is a member of the Ethical Trading Initiative Norway (IEH), a membership organisation for private and public enterprises and organisations. IEH is a resource centre and an advocate for ethical trade practices. Vestre reports annually to IEH. This report is made publicly available.

Vestre aims to continuously improve policy and practice that supports suppliers in complying with this code of conduct.

## **Principles**

Vestre's suppliers are to supply goods and services that are produced in compliance with the code of conduct. Moreover, the suppliers are to communicate the code of conduct to their sub-suppliers, and to monitor implementation.

A supplier must be able to document compliance with the code of conduct at Vestre's request. Such documentation may take the form of self-declaration, follow-up meetings, and/or inspections of the working conditions at production sites. The supplier will be obliged to name and provide contact information for any sub-supplier that Vestre wishes to inspect.

In the event of a breach of the code of conduct, Vestre and the supplier will jointly prepare a plan for remedying the breach. Remediation must take place within a reasonable period of time. The contract will only be terminated if the supplier remains unwilling to remedy the breach following repeated enquiries.

When selecting new suppliers, emphasis will be given to social and environmental standards.

We will operate in accordance with UNGP (United Nations Guiding Principles) and UN Global Compact

## **Requirements relating to own practice**

Vestre will continuously work to improve our policies and practice to enable our suppliers to be able to comply with our code of conduct.

Neither Vestre nor any of its employees shall ever offer or accept illegal or unlawful monetary gifts or other forms of remuneration in order to secure business-related or private benefit, or benefit for customers, agents or suppliers.

Vestre and Vestre's suppliers shall avoid partners that operate in countries subject to international boycott by the United Nations and/or Norwegian Authorities.

The management system is key to the implementation of the code of conduct. Vestre emphasises the importance of suppliers having systems that support such implementation. Vestre's expectations in this regard are summed up in the following measures:

- The supplier should make a centrally placed employee responsible for the implementation of the code of conduct in the supplier's business.
- The supplier must make the code of conduct known in all relevant parts of its organisation.
- The supplier must obtain Vestre's consent prior to outsourcing production or parts of production to a sub-supplier/contractor, if this has not been agreed in advance.
- The supplier must be able to give an account of where goods ordered by Vestre are produced.

vestre

Vestre believes in socially responsible business. Promoting decent working conditions and environmental practices in our supply chains is part of our strategy to act in a socially responsible manner. In pursuit of this aim, we therefore wish to cooperate closely with our suppliers and business partners.

Focusing on working conditions and the environment at the production stage has financial benefits and also strengthens

competitiveness. Various studies have shown that improving occupational health and safety, regulating working hours and paying decent wages improves productivity and quality, and similarly reduces the number of occupational injuries.

We seek to form long-term relationships with suppliers and business partners who share our values and focus on promoting decent working conditions and environmental practices in the supply chain.
